Dear Resident,

Please be advised that there is cold weather predicted for our region in the coming days. There is a small chance that this forecast could potentially cause freezing issues with the temporary water bypass service that is currently serving your home.

As a precaution, please open a faucet in your home to allow a continuous trickle of water to run. Running water through the pipes, even at a trickle, will help to prevent freezing of the bypass hose and potential interruptions to your temporary water service.

If you should need assistance or find your temporary water service to be frozen, please notify the following contact:

1. Scott Karpinski, J. Marchese -- 617-212-1515
2. Steve Englehardt, J. Marchese & Sons -- 617-212-4794

We thank you in advance for your cooperation and appreciate your understanding in this matter.

For additional assistance please contact DPW Dispatch at 781-316-3301.
