Mean retirement income (dollars)	27,455	(X)	(X)	24,082	(X)	(X)

The American Community Survey (ACS) is a nationwide survey designed to provide communities a fresh look at how they are changing. It is a critical element in the Census Bureau's decennial census program. The ACS collects and produces population and housing information every year instead of every ten years. About 3.5 million housing unit addresses are selected annually, across every county in the nation. The ACS produces 1-year estimates annually for geographic areas with a population of 65,000 or more, as well as 3 and 5-year estimates annually for geographic areas with a population of 20,000 or more.
